

E-Gram Seva

Review: Feasibility Report v1.0

Team 22

January 15, 2013

REVISION HISTORY

Version	Author	Date
Version 1	Aayushi Sharma, Surbhi Singhal	January 14, 2013
Version 1 Review	Biman Gujral	January 15, 2013

Anomalies Identified

1. Project Description

- Information to be sent through SMS updates includes specifically prices of crops, weather information and health-related news.
- Support service of the project, wherein users can send queries through their mobile phone is only a future prospect and not a current aim.
- We are developing a website for the rural population and not a web-based application.

3. Loopholes in the Present System

- The villagers reported inadequate health care support. This has not been listed as a loophole.

4. Feasibility

4.1 Technical

- Use of Visual Web Ripper software for extracting information about prices and weather from the internet into the database is not listed.

4.3 Social

- Typographical Error: Agriculture is the primary occupation of the Indian rural *population*.
